Effort being Made for 24-Hr. Phone Service

A representation of citizens met Mr. Buckley, of the Telephone department, on Wednesday night re 24 hour service for Mirror. The matter was fully gone into, with the result that if Mirror can increase her telephone to a certain number, we can get it. The telephone is one of the most necessary items of life, and many a time it has been the means of saving the life of someone dear to us; at other times it has been the means of saving property from loss by fire, an instance of which occurred in the Ripley district only recently, when the telephone was the ultimate means of saving a home, but in which a party suffered from frost-bitten toes owing to the fact that she had to go to a neighbor to use the phone as they had none in the house. It is hoped that many can see their way clear to install a phone so that it can be made more useful to us all. Surely if the small town of Alix can support the 24-hour system, also Ferintosh, why cannot Mirror? So let us all boost for the 24-hour service.

Rev. W. Simpson gave a very interesting address to the congregation and Sunday School scholars of the Anglican Church on April 23, when a full church turned out to welcome him. Mr. Simpson is a very pleasing speaker and a return visit will be looked forward to. At the conclusion of the service Mrs. Simpson addressed the ladies of the congregation.

The I.O.O.F. held its annual Church Service on April 23rd, in celebration of the 108th anniversary of the founding of the order. The members assembled in the Elks Home and marched in a body to the church where the service was conducted by Rev. R. G. Wood. Taking as a text, "Inasmuch as ye have done it unto the least of these my brethren ye have done it unto me" the speaker briefly reviewed the ideals of the order and laid emphasis on the need of understanding its place in the life of the community. The great cardinal principles of benevolence and charity which are evidence of its expression of brotherhood. Tribute was paid to the work which has been done along these lines and the need for a better appreciation of all such efforts. Special music was contributed by the choir and the old anthem, "Does Your Anchor Hold" rendered effectively.

Rev. A. A. Lytle, Field Secretary for the Bible Society, paid a visit to Mirror last week and during his stay was a guest at the parsonage.

Mr. and Mrs. J. T. McMasters have returned to town and are taking up their residence in their former home.

Miss Wend, private secretary to J. Clarke, asst. Supt. of the C.N. at this point, who returned last week from the hospital, left on Monday for Big Valley where she will spend a couple of weeks recuperating before again taking up her duties. Mr. Dalagata is relieving during her absence.

"It Pays to Advertise"

Additional Locals

Mr. and Mrs. J. A. Junget, of Cabri, are visiting the son in town.

Messrs. Kerr, Clark, Walters MacClelland and Stranaka attended a meeting of the division staff the Canadian National at Calgary on Friday last.

Mrs. J. T. Kerr is spending a few days with friends in Calgary.

For Sale—House on Frances ave. north, 3 roomed house with two lots; good well; garage, and fenced. For particulars apply at this office.

VILLAGE OF MIRROR

To Contractors

Tenders are invited for the erection and completion of a Village Hall and Office for the council of the Village of Mirror.

Plans and specifications may be obtained on application to J. G. Russell, sec. treas. Mirror, or to D. S. McIlroy, architect, 222 8th Avenue West, Calgary.

Tenders will be received by the Secretary Treasurer on or before Saturday, May 14, 1927.

The Council do not bind themselves to accept the lowest or any tender submitted.

D. S. McILROY, Architect, Calgary.

Consequent upon an agreement reached at a general conference of Canadian and United States telegraph companies the Canadian Pacific Telegraphs have announced that code words will be accepted at all their offices in future for day and night letters. This departure will affect both Canadian and international business, the companies concerned being: the Postal-Telegraph Company, the Canadian Pacific Telegraphs, the Canadian National Telegraphs and the Western Union Telegraph Company.

The development of a new industry from the propagation of muskrats and other water fur-bearing animals, in land and water areas, leased from the Province of Alberta through agreement with the Dominion Government, was indicated by Hon. George Hoadley, Minister of Agriculture, in committee discussion in the Alberta Legislature. The amendment would give the Government power to regulate and license fur and game farms, and to lease the Dominion water and land areas for the propagation of such animals.

A keen competitor to Betsy Wiley, the Nova Scotia world's champion milk and butter producer, has been discovered at Fox River, Cumberland County. Mr. Henry S. Kerr of this place, claims that he owns the champion butter producing cow in her class. This cow is a grade Ayrshire and Durham cow, which has just recently freshened. In one week she produced 392 lbs. of milk which churned 20 1/2 lbs. of butter, after deducting approximately 12 quarts of milk and 1 1/2 quarts of cream for home consumption. This record is creating keen interest.

Following upon his recent announcement to the effect that a Toronto firm of architects would be employed in connection with the erection of the new Canadian Pacific Hotel in that city, E. W. Bratty, chairman and President of the Canadian Pacific Railway, recently stated that Messrs. Bennett and Dolph had been appointed associates with the firm of Ross and Macdonald, of Montreal, to handle his work. Messrs. Ross and Macdonald have been employed in Canada for some time. The rest of their building being the company's new hotel at Regina. He desired that the new hotel should be thoroughly representative of the city in which it stands and the apartment of a firm of Toronto architects to assist in the work.

New Carillon Of Bells At Ottawa Said To Be Largest Of Its Kind In The World

The carillon of 53 bells built at the bell foundry in Croydon for the Canadian Houses of Parliament at Ottawa, is the largest of its kind in the world. It is practically a sister carillon to the fine bells installed by the same firm, Gillett and Johnston, in the Park Avenue Baptist church, New York, but whereas the New York Bourdon bell weighs 9½ tons, the Ottawa Bourdon weighs ten tons. The 53 bells extend through four and a half chromatic octaves from the Bourdon, low "C" to the 14-pound top treble, high "A".

Every bell is in tune with itself—that is, it has been tuned accurately on the five tone harmonic principle. The whole carillon has also been carefully tuned to the scale of equal temperament, so that the performer can moderate from one key to any other without offending the ear. Before each bell was tuned, the scale of equal temperament over 200 years ago, it was impossible to attain this result in ordinary music, and until the last few years this refinement was unknown to the bell world.

The carillon also has been tuned absolutely to international pitch, which is in general use for ordinary musical instruments and modern concert practice in both hemispheres.

The total weight of the bells is 53 tons and the weight of the steel framework and fitting is about 22 tons.

The inscription on the Bourdon bell is in English on one side and in French on the other; and round the top of the bell a continuous design of maple leaves has been moulded. At the special request of the Canadian Government, the wording of this inscription has not yet been divulged.

The world's record was achieved in the time taken to construct the carillon—from the date when all the details were settled all 53 bells with the necessary machinery have been finished in 18 months.

The 10-ton Bourdon bell will be the second largest individual bell in Canada and the third largest on the American continent.

An elaborate "practice clavier" is being supplied with tuned bars and resonators and having a keyboard exactly similar to that of the carillon (or console) in that the carillonist can learn from pieces without annoying the neighbors. A more important use of the "practice clavier" is to enable pupils to learn the rudiments of playing and acquire a certain amount of proficiency particularly in pedal work before playing on the tower instrument is permitted.

The clock mechanism is divided into three separate units, the "ring train" driving the hands of the four 15 ft. 9 in. diameter clock faces, while the "striking train" and "quarter train" are placed 50 feet below, under the bells. The old-fashioned clock weights are dispensed with and in their place powerful electric motors lift and release the enormous clock hammers. The carillon will be shipped to Canada shortly, so as to be inaugurated on Dominion Day, July 1st. The Victory Tower is possibly the finest position in existence for the purpose of carillon music.

Values of Farm Lands

Average Value for Whole of Canada: \$37 Per Acre

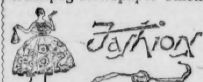

According to a recent compilation made by the Canadian Government Bureau of Statistics the average value of the occupied farm lands of Canada as a whole, including both improved and unimproved land, as well as dwelling houses, barns, stables and other farm buildings, is returned as \$37 per acre, as compared with \$28 in 1925, and with \$27 in each of the two previous years. By provinces the averages are as follows: Prince Edward Island, \$46; Nova Scotia, \$36; Manitoba, \$29; Saskatchewan, \$25; Alberta, \$25; British Columbia, \$36. The average values in 1929 of orchard and fruit lands, including buildings, etc., in the fruit-growing districts are estimated to be as follows: Nova Scotia, \$129; Ontario, \$124; British Columbia, \$320.

Ploughing Peas Under As a Green Manure

Results in a Lowered Yield of Wheat for Following Season

The ploughing under of peas as a green manure has resulted in a lower yield of wheat the following season as compared with the best follow, in experiments conducted at the Brandon, Manitoba, Experimental Farm. Although the ploughing under of the peas may increase the nitrogen content of the soil, this is more than counter-balanced by the loss of moisture involved. The later the green peas are ploughed under the greater is the amount of water dissipated. The experiments were made on a rich loamy clay soil.

Winnipeg Newspaper Union

The Bloused Silhouette a Smart Feature of New Mode

A great deal of charm is expressed in this frock with its bodice slightly bloused at the sides and across the back. The convertible collar and scarf tie made in chic, while the skirt flares at the sides in an extremely smart way. It is in sizes 16, 18 and 20 years, \$12.95 (16 to 18) or \$14.95 (18 to 20). 24-inch bust, 24-inch waist, 44-inch skirt, 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Highway Construction

Millions Spent on Provincial Highways in Canada in 1928

During 1928 a total of \$15,543,000 was spent on construction of all provincial highways in Canada, according to computations made by A. W. Campbell, Dominion highway commissioner. Of this total \$20,580,000 was spent on construction and the balance, \$15,978,000 on maintenance of highways already constructed. The total mileage of roads involved in this aggregate expenditure was 16,524.

Older Ontario led with a total outlay of \$21,170,000, total mileage involved being 15,641. The other provinces expenditure was divided as follows:—Nova Scotia, \$1,900,000, mileage 13,006; Saskatchewan, \$3,550,000, total mileage, 5,400; British Columbia, \$3,475,000, mileage 4,600; Alberta, \$2,110,000, mileage, 1,238; New Brunswick, \$1,150,000, mileage 1,735.

Manitoba spent \$1,300,000, of which \$550,000 was on construction, total mileage, 809; Prince Edward Island, \$230,000, mileage, 709.

The total mileage of highways constructed in Canada in 1928 was 5,768, and the largest mileage in any province was New Brunswick, with a total of 1,604; Older Ontario, with 529; Northern Ontario, with 323 miles; Quebec, with 713; Manitoba, with 665; Alberta, with 652, of which 275 was colonization roads; Saskatchewan, with 489; British Columbia, with 343; Nova Scotia, with 253, and Prince Edward Island, with 39 miles.

Many Uses of Wood

Demand for Wood Now Greater Than Any Time in World's History

In spite of the increasing use of substitutes for wood the people of the world now before used as much of that material every week as at the present time. The modern steel ocean passenger ship has much more wood in its decks and fittings than would have built an entire wooden ship of sixty or seventy years ago. It was in all seagoing and, without any idea of a play on words that a noted Canadian conservationist pointed out recently that in spite of all modern inventions man is still surrounded by wood in every stage of his progress from the cradle to the grave.

Date of Ploughing Summer-Fallow

Early Ploughing Appears to Give Better Results

In experiments conducted at the Brandon, Manitoba, Experimental Farm, the yield of grain following fallow has varied inversely with the lateness of ploughing the fallow. Ploughing on May 15 gave better results than ploughing on June 15, and ploughing on July 15 decreased the yield still further. Besides, the July ploughing does not control annual weeds. They grow uncontrolled until the time of ploughing and thus use up a great deal of valuable moisture.

Demand for Poultry

During one week in April, orders for over 75,000 white Leghorns, from six weeks old up, had to be refused by breeders in Southern British Columbia on account of shortage of stock, though hatching this season were larger than ever. Some breeders have given notice that orders for next season must be placed at once to ensure delivery.

Ted—"That broken-down old man wants to get married again."

Kod—"Wants to be repaired, eh?"

At the Music and Crafts Festival, Quebec

Franklin Originated Daylight Saving Idea

Scheme Was Proposed in 1784 by British Writers

People of Great Britain, Belgium, Holland and France lost 95,000,000 hours of sleep as a result of clocks throughout those four nations being put forward one hour at the inauguration of summer time. The shift of April 5-19 was fixed upon by an agreement reached in February between representatives of those governments, as the official start of daylight saving time. It will be in effect until the night of October 1-2 when normal time will be restored.

Credit for originating the idea of daylight saving, according to British writers, belongs to Benjamin Franklin, who in 1784, it is said, proposed a well thought scheme of daylight saving. In the story related here, a forgotten man neglected to close the shutters of his bedroom window one evening, and the next morning Franklin was awakened by sunlight streaming into his room. He was actively astonished at finding daylight and sunshine at such an hour; and he was also greatly pleased with his discovery. In consequence he promptly worked out a scheme to make everybody get up at a hour, during the summer months. To enforce his scheme he suggested that all shuttered windows should be raised and that church bells should be rung loudly on the appointed hour of rising. Further he proposed that if there were sleepy heads, "cannon should be fired in every street to wake the sluggish effectively." Under his scheme no one "regardless of rank, wealth or privilege" was to be exempted from early rising.

Experiment Was Interesting

Movement of English Channel Determined by Drift of Bottles

Interesting results of an investigation into the water movements in the English Channel are given in the Journal of the Marine Biological Association. It is necessary to know these movements because of their effect on the drift of fish and other marine life.

In July 1924, 500 bottles were put in the sea, some designed for drifting on the bottom and others on the surface. Surface bottles travelled rapidly up channel to the North Sea and across it. Many arrived in the Skagerrack, a journey of about 700 miles, made at the rate of more than six miles a day.

Two stranded in Jutland, three, went ashore north of Göteborg, Sweden, and two at the head of Chatham Firth. One bottle covered 1,410 miles at least and had done this in 130 days at "the amazing overall speed of some 7.7 miles a day."

Jasper National Park

Jasper national park in Alberta, with an area of 1,100 square miles, is one of the largest "playgrounds" in the world. A part of the reserve to the north of the central section is still unexplored, but the park is being rapidly opened up by the construction of trails and highways.

Old Coin Discovered

While cleaning out an abandoned dwelling house at Blevy, Ireland recently, Patrick Thomas found a five shilling piece bearing the date of 1846. Although the coin is 281 years old it is in a good state of preservation and is believed to be valuable.

A lot more people would take a friendly interest in you if you made a noise like a roll of greenbacks.

Vital Importance Of Forests As A Source Of Employment Should Be Fully Recognized

Investigates Marketing Conditions

Prof. Swanson Says London Has Again Become Financial Centre of World

"London has again become the financial centre of the world," Prof. W. W. Swanson, head of Saskatchewan livestock marketing commission, told the Canadian Press in London, after an extended tour of Europe. The commission had investigated marketing in England before going on the continent. Summarizing the commission's findings, Prof. Swanson said it had found Great Britain "a distinct improvement in business, and in the attitude both of capital and labor."

"We were very much impressed in Denmark by the manner in which the Danes have organized farming, both in its economical and social aspects," Prof. Swanson said. "Co-operation there has been carried to a pitch of excellence probably not equalling anywhere else."

"We were struck by the fact that the farmers themselves control their economic life, making relatively little governmental supervision or assistance."

"The Danish educational system has been made an integral part of the economic life. In some Danes opinion the country is really over-organized."

"In Germany and Poland we found evidence that these people were making every effort to increase their agricultural and industrial output, pushing aside the political animosities so rife at the end of the war."

Commercial Fisheries in the West

Fish to Value of \$3,522,167 Caught in Lakes and Rivers of Western Canada in 1926

About 50 per cent. of the \$3,522,167 worth of fish caught in 1926 in the fresh waters of the lakes of the Canadian Prairies Provinces—Manitoba, Saskatchewan and Alberta—found a ready market in New York, Chicago, Buffalo, Detroit and other American cities.

The market value of fish caught in the three Prairie Provinces shows an increase in value of \$1,613,842 compared with the value in 1925. White fish, tullibee and pike were the principal kinds of fish exported to American markets, the first named being most in demand. Last year 11,000 pounds of royal salmon, from which comes the delectable and expensive caviar (the market price of which is about 1¢ per pound), a favorite dish with many epicureans, were caught in Manitoba.

Western Canada is chiefly famous as a great wheat producing and mixed farming country and consequently little is known of its commercial fisheries and other natural resources. In the provinces of Manitoba, Lakes Winnipeg, Manitoba, and Winnipegosis are really fairly sized inland seas that yield the principal supplies of fish in the lake and Saskatchewan the numerous lakes in the central and northern parts of the province are the sources of supply. The Alberta commercial fisheries are to be found mainly in the lakes south of Edmonton.

The Test

The big man was telling the interviewer how he got started in his profession.

"When I was an infant, my good folks were undecided what I'd become when I grew up, and they struck on a plan. They fetched an apple, a prayer-book and a dollar-bill. If I played with the apple, a farmer I'd be—if I'd play with the prayer-book, I'd be a parson—if I'd play with the dollar-bill, I'd be a banker. They left me alone for a few minutes, and when they entered the room later I was eating the apple, reading the prayer-book, and I had put the dollar-bill in my pocket—so that's how they made me a politician.—Forbes Magazine.

The waters in the Canadian national parks in Western Canada offer splendid inducements to the angler. Five varieties of game trout have their habitat in the waters of the parks, namely, cutthroat, lake, bull, yellow, bull, and brook.

England is attempting to introduce the Douglas pine. It reaches a height of 200 feet in this country, more than twice the height of any tree in England's forests.

Somewhat the people who always say what they think have a mouth for saying disagreeable things.

Manitoba Mining District

Provincial Department of Mines May Soon Be Established

"That the mining industry of Manitoba has developed to a stage of importance that it requires closer governmental contact is indicated by the appointment of Prof. R. C. Wallace of the University of Manitoba, to the newly created post of commissioner of mines. This step is preliminary to the establishment of a department of mines in the provincial government, according to a statement given out by Premier Bracken. Mr. Wallace was commissioner for northern Manitoba for five years under the Norris government and is considered an outstanding authority on Manitoba mining. He will retain his position at the university, while acting as mining adviser to the government. His duties will be to coordinate with the industrial development board, the chamber of mines, and other mining bodies for the development of Manitoba's mineral resources."

The potential value of the forests as a very great asset is being enthusiastically stressed, but the value of the forests as a source of employment affects us all vitally and particularly, says the Natural Resources Intelligence Service of the Department of the Interior, Ottawa. According to the latest census of figures there are nearly 150,000 persons employed in the wood and paper industries of Canada and 9,000 in the logging industry. In the construction industry where wood plays such an important and essential part, another 185,000 are employed. Transportation services, which owe so much to products of the forest, which constitute one of their largest and most consistent sources of revenue, afford employment to nearly one quarter million persons, and so on. In fact almost every industry, not excluding agriculture itself, directly or indirectly relies for necessary equipment and supplies on the forests.

In connection with trapping, hunting and fishing, the value of the forest is of first importance, for if the forests were destroyed, fur and game animals would rapidly become nonexistent. The beauty of the forests, lakes and mountains, the abundance of game and fish, attracts many visitors and provides health and pleasure, also a large annual revenue to Canadians.

Forests grow, mature, deteriorate and decay. Once a tree has attained maturity nothing is to be gained by postponing its cutting. When cutting the mature tree, however, the protection of the small tree struggling for its existence nearly stops the assurance that the forest of today are our forests of the future.

One well-known forest authority has suggested that in each district where timber rights are granted, the average annual growth per acre be ascertained and only the larger trees, to an extent not exceeding the annual growth of timber as a whole per acre, be cut. The forests would be growing in value year by year if this plan were followed.

The planting of trees and shrubs along highways and bordering fields for windbreaks will, as the practice increases, become a means of increasing the wood supply materially and, in the course of years, may build up a valuable source of timber supplies.

Manitoba Mining District

Provincial Department of Mines May Soon Be Established

"That the mining industry of Manitoba has developed to a stage of importance that it requires closer governmental contact is indicated by the appointment of Prof. R. C. Wallace of the University of Manitoba, to the newly created post of commissioner of mines. This step is preliminary to the establishment of a department of mines in the provincial government, according to a statement given out by Premier Bracken. Mr. Wallace was commissioner for northern Manitoba for five years under the Norris government and is considered an outstanding authority on Manitoba mining. He will retain his position at the university, while acting as mining adviser to the government. His duties will be to coordinate with the industrial development board, the chamber of mines, and other mining bodies for the development of Manitoba's mineral resources."

Canada's exports of paper exceed those of any other country in the world, and in the matter of newspaper paper her exports are probably greater than those of the rest of the world combined.

Visiting Minister: Ah, my unfortunate friend, this world is full of troubles, isn't it?

Hard Case: It ain't the trials that worries, sir; it's the verdicts.

New Machine Records Telephone Messages

Cylinders Take Half-Hour Conversation, Giving Warning of Time Limit

A new machine records a telephone conversation, then repeats it later when required. In the latest word in office equipment.

It is known as the telegraphophone, and is a cross between a telephone and a dictaphone.

If an important conversation is to take place by telephone all that has to be done is to press the telegraphophone switch and every word will be faithfully recorded.

Later the machine can be made to "play" the cylinder recording the conversation just like a gramophone. Other advantages claimed for the machine are:

It serves as a telephone with a microphone instead of a mouthpiece; and

In the event of a conversation being dropped it can relay the original conversation through the phone to the disputing party, even though he be hundreds of miles away.

It can also be used in conjunction with a wireless receiver to record telegraphic and telephonic messages, even transatlantic ones.

If not for any hour of the day or night it will record automatically any message it picks up, stopping and starting as words or code sign are heard.

This compares with the picture of the owner of a telephone machine to be left and leaving his machine to take down a verbal message at 8:30, 2 a.m. from a business man in New York in the morning the owner turns on the "microphone" attachment and hears the message that came over while he was asleep.

Each cylinder takes half an hour's conversation, and the machine gives ample warning when the time limit is nearly up. If the talk is not to be preserved the cylinder can be scraped and used again. It will stand scraping 50 times, giving it a life of 45 hours of conversation.

Searchlight to Pierce Fogs

Inventor of Television Discovers a Dark Ray With Wonderful Possibilities

Belief that the day may not be far distant when every vessel will carry an "invisible searchlight" to pierce fogs and every automobile a fog penetrating dark lamp is held by J. L. Baird, inventor of television, who has discovered a dark ray which he says will pierce thick fog or smoke.

Dr. Baird's discovery is his invention, which he calls "actinotelsion," at his laboratory in London and will fit a laboratory steamship with apparatus in June for further tests.

After witnessing tests recently, Admiral Mark Kerr said he thought the invention the biggest thing discovered for sea and air travel in a long time.

The admiral, with others, saw Baird transmit a doll's features through an artificial fog produced by chemicals so thick that his assistants were choked in it. The dark ray was described by its inventor as a sort of invisible searchlight which has 16 times the penetration power of ordinary light through fog or smoke.

Baird, who is understood to have discovered it as an outgrowth of his experiments with television, claims the new ray will rob fog of its terror and will make smoke-screens in war time useless.

One of the strange features of the ray is that it makes a sound when it encounters a solid object or even a ray of light. Each object produces a different sound, enabling determination of its nature. For instance, Baird said he found that the ray, when thrown on Nelson's monument in Trafalgar Square, produced a different note from throwing on the dome of a nearby theatre.

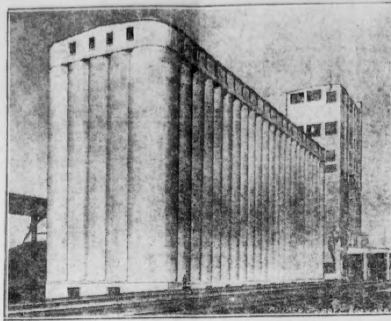

Searching For Lost Vessel

Wooden Sailing Ship Has Been Missing for 146 Years

British shipping authorities are vowing to trace a wooden sailing vessel last heard of 146 years ago and enable command by the famous Captain John Paul Jones. Launched 160 years ago at Portsmouth, New Hampshire, the ship was captured by the British during the United States War of Independence and became U.S.S. *Hollyday*. She was later sent into mercantile service and nothing is known of her place. It is believed the vessel was sold to William Scott, Lord Stowell, who at the time was carrying on business at Newcastle-on-Tyne.

There is now only one survivor, Sir George Popham, of those who were Captain's mates under Sir John A. Macdonald. He entered the Government in 1885.

Operations of the Alberta Wheat Pool's Prince Rupert Terminal

The Alberta Wheat Pool has loaded twenty-five ships with wheat from the 1926 crop at Prince Rupert and expects to bring the total up to twenty-four before the crop movement is ended this spring.

The Alberta Pool terminal at Prince Rupert has already handled 2,158,000 bushels and the total will reach 2,788,000 bushels within a few weeks. This is a larger total than was anticipated last fall.

The Prince Rupert house was built and is owned by the Canadian Government, has a capacity of 1,250,000 bushels and is probably the fastest handling terminal on the coast. It is under lease to the Alberta Pool for a term of two years. Joseph Donnelly is superintendent of this elevator.

Through the Pool's extensive operation, the ocean freight differential has disappeared and grain is shipped to Europe from Prince Rupert at the same rate as from Vancouver.

Of the twenty-four ships already loaded or committed, six carried grain to the Orient and eighteen to Europe.

Previous to the Pool leasing the Prince Rupert house, wheat had been shipped from that port.

Build Up Character

Psychologist Tells Us How to Develop Personality

Want to change yourself? Easy enough says Henry Knight Miller in an editorial in the May issue of "Psychology Magazine."

"Your present condition," writes Dr. Miller, "is but the externalization of the predominant impressions which through suggestion you have stored up in the subconscious mind, not the ideas which you occasionally entertain. What you persistently think determines to a degree what you are and where you are."

"Learn to use this tremendous force," continues Dr. Miller, "and there is almost no limit to what you can achieve. This is the divine science which transforms weakness into strength, poverty to wealth, sickness to health, and defeat to life triumphant. Your destiny is in your own hands."

Dr. Miller points out that it is through the Conscious mind that the Subconscious, which governs emotions and instincts, is controlled. The conscious mind is the guardian at the gates of the subconscious. The conscious mind consists of the faculties of attention, perception and reason. Learn to exercise these three and every situation in life may be rationalized and understood.

"The man who reasons," concludes Dr. Miller, "cannot be defeated by any chance circumstances."

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative. Indeed, when judged by the benefits which it performs, expect relief and permanent benefit when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Three Good Reasons. Auto Tourist—I clearly had the right-of-way when this man ran into me, and yet you say I was to blame. Local Cop—You certainly was. Auto Tourist—Why? Local Cop—Because his father is mayor, his brother is chief of police, and I go with his sister.

Noted men have been known to be superstitious. Charles Dickens believed in the luck of Friday and the Earl of Balfour when in the House of Commons was often seen to "touch wood."

Mount Macbray
Mount Macbray, 2,926 feet high, is situated to the west of Grant pass on the Alberta-British Columbia boundary. According to the Geographic Board of Canada, it commemorates the late Most Rev. Robert Macbray, Anglican Archbishop of Winnipeg, Lord and Primate of Canada. Archbishop Macbray frequently spent his period of recreation in this district.

A scientific expedition in South America has discovered a tunnel three miles long and several inches in diameter, made and regularly used by man.

China, the home of the silk worm, is buying quantities of silk in the finished garment from America and France.

SUNDAY SCHOOL LESSON

MAY 8

PETER AND THE RISEN LORD

Golden Text: "Blessed be the God and Father of our Lord Jesus Christ, who according to His great mercy has brought us again unto a living hope by the resurrection of Jesus Christ from the dead."—1 Peter 1:3.

Lesson: John 20:19; 21:1, 2, 3.

Explanations and Comments

1. Mary Magdalene's discovery at a stone had been placed over the entrance of the tomb in which the body of the crucified Saviour had been laid (Mark 15:46), and the stone had been sealed (Matthew 27:66). The stone was probably a cylinder one which could be rolled aside in a groove at the base of the opening of the tomb. Early on Sunday morning, Mary Magdalene came to the tomb with the others, as the "we" in the next verse indicates. She found the stone removed. At once she hastened to tell Peter and John (John always refers to himself in the Gospel as "the disciple whom Jesus loved"). They have taken away the Lord out of the tomb, and we know not where they have laid Him.

"The Catholic who cannot find the grace in these Easter days to have the stone rolled away whether it be pride, greed, or pleasure, that keeps him tumbled in his own selfishness, is certainly wanting the grace of Easter."—Catholic Standard and Times.

2. Peter and John at the Tomb of Christ, John 20:1-10. The two disciples ran to the tomb. John reached there first and, looking in, he saw the empty tomb. Peter rushed into the tomb and saw a wonderful thing; the linen cloths which had enveloped Christ's body were rolled up and the napkin, which had been about his head, was in another place. Evidently and orderly had been Christ's departure. Had others carried off his body, the grave clothes would not have been found. Peter, then, "entered the tomb, and the sight sufficed him; he believed that Christ was risen." A heart full of love for Christ rejoiced but little proud to find in him a living Lord. The apostle of love was the first person to believe in the risen Christ, and he was who afterwards recorded that beatitude which fell from the lips of his living Lord, a beatitude of peace, of which he was the first to know and in which we all now share. "Blessed are they that have seen, and yet have believed."—C. R. Erdman.

For all pain—Minard's Liniment.

Make Mendicancy An Art

Beggars in France All Carry Manual of Instructions

Mendicancy is an art in France, and Gallie beggars have a "Manual for the Use of Beggars" to instruct them in the art.

The book, which includes a "sack or list" of good prospects, emerges from the pocket of a beggar when a Paris judge admired his knowledge of "why, it's an art," exclaimed the beggar, drawing forth the textbook in explanation.

Most of the chapters are devoted to technical instruction, such as how to operate at banquets, marriages, funerals and the methods of attaining sympathetic attention.

There is instruction in how to seek food, stimulation of certain ailments, feigning of suicide attempts and the concealment of legs or arms for displacement by false ones.

Had Lengthy Journey

Cabbage Grown in Texas Purchased at Grand Falls, Newfoundland

How far does a head of cabbage travel? A man in the city of San Benito, Texas, employed at a vegetable shipping house, was curious, and during the season he picked out an exceptionally large head of the vegetable and wrote a note on it asking the recipient to inform him where it finally landed.

Recently he received a reply to his cabbage epistle. It came from a buyer at Grand Falls, Newfoundland, clear across the continent.

An Oil that is Priced Everywhere.

Dr. Thomas' Electric Oil was put upon the market without any flourish over thirty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a wide circulation for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Be—"Are you working, Joe?" Mike—"Sure, I got a dandy job this day-traveling tracks. I had to quit every minute or so to let the cars pass."

Little Boy: "Mother, who put the statue under the kitchen sink?" Mother: "Hush, sonny, be quiet. That's the plumber."

Unfortunately a man's epilepsy comes along too late in the game for him to live up to it.

London Has Mystery Clock

Secret of Mechanism Will Be Revealed Only to Purchaser

A clock with no sign of any mechanism is the latest novelty in London. It cost £200 to make. Although the crystal is transparent, no apparent connection between the hands and the mechanism.

The face of the clock is embedded in a slab of crystal 5 in. in diameter, and the hands, made of platinum and diamond, revolve on a thin metal pin. There is, however, no apparent connection between the hands and the mechanism.

Although rich enamel, gold, and jewels are used to decorate the framework, it is the craftsmanship that accounts for its high price, and the secret of the mechanism will be revealed only to the purchaser.

Record Building Activity

Indications are that building in Canada will be more active than it has been for several years. For the first three months of the year there is proposed construction amounting to \$295,122,000, which is actually 44 per cent. higher than the total in sight at the corresponding period of 1926. The lead is taken by residential contracts, which is a natural result of the upward trend of business that has been noted for many months past.

If success doesn't turn the average man's head it's because he has a streak.

Borden's EAGLE BRAND

If at all possible, nurse babies. If not, use Eagle Brand, the safe food that doctors have endorsed since 1857.

A Sour Stomach

Causes bad breath, gassy pains, coated tongue and "belching." These miseries are easily relieved by Chamberlain's Tablets.

PROSPERITY OF THE WEST IS NOW ON A SOLID BASIS

Montreal.—A picture of Western Canada steadily climbing to prosperity on a solid stable basis was painted for members of the Montreal branch of the Canadian Credit Men's Trust Association by W. R. Dutton, Edmonton, the national president of the organization, at their monthly luncheon today.

Beams and other artificial trade aids had been left behind, Mr. Dutton declared. He described how mixed farming was playing an important part in the development and prosperity of the prairies, and said that in his judgment just one more good crop is needed to put this country "over the top."

He was confident this would be a good year for the West, and that eastern business houses at the end of the year would see some reflection of this in increased orders for raw goods they had to offer for sale in Western Canada.

Declares Border Law Menace to Friendship

Toronto Banker Urges Compromise in U.S. Passport Regulations for Canadian Commuters

Buffalo, N.Y.—Members of the Buffalo Kiwanis Club attending a United States Canada luncheon were warned by George Wilson, Toronto banker and civic leader, that the new passport requirement for Canadians working in this country might be compromised in some manner in the present unfriendly and extremely cordial relations between the two countries are to be maintained.

"The two countries this year are celebrating 115th anniversary of the 1783-84 treaty which practically eliminated the activity of armed forces along the border," said Mr. Wilson, "and year by year the relations between the peoples have become more friendly. Yet, in the midst of all this and at a time when thousands of Canadians and almost an equal number of Americans commute daily from one country to the other, furnishing excellent labor for businesses, the United States has announced its new passport regulations."

"I sincerely hope that some compromise will be reached, Canada undoubtedly would resist if the new regulations were to stand."

Served in Canadian Forces

Funeral of U.S. Citizen Attended by Canadian "Citizen" in Full Regiments

Washington, D.C.—For the first time in history a Canadian mounted policeman in full regiments attended the funeral of a United States citizen on United States soil.

Sgt. Maj. Richard Croft, a native of Baltimore, who served in the Canadian forces throughout the war, was buried here and Corporal Hugh Lambert, attached to the Canadian legion, attended the funeral.

Mr. Mayner, the Canadian minister, was represented by his private secretary, A. T. Stone. The coffin was draped with the United States and Canadian flags. Stone laid a wreath on the coffin.

Increase in Overseas Immigration London.—Improving immigration conditions overseas are noted in the report of the overseas settlement committee for 1925 under the chairmanship of the Earl of Clarendon, which was issued recently. The report shows that further facilities for assisted passages resulted in 46,053 settlers migrating under the Empire Settlement Act last year, compared with 39,559 in 1925.

Great Britain Desires Peace New Orleans, La.—The interests of Great Britain are central first and foremost in the conclusions of the conference of the British Empire, and you may rest assured that if journalists or others say the contrary they are talking what is obvious nonsense," Sir Esmé Howard, British ambassador to the United States, declared here at a luncheon, before the English Speaking Union of New Orleans.

Mint at Canton Burned London.—An exchange telegraphic despatch from Hong Kong reported receipt of a message carrying the Chinese Government (Cantonese) mint at Canton was ablaze. Arson was suspected, the message added, and "a Chin man, described as leader of the riots, had been arrested."

W. N. O. 1479

May Extend Empire Settlement Agreement

New Features Likely to be Included in Proposed Extension

Ottawa.—It was expected that the 5,000-family Empire settlement agreement is awaiting the consideration of Hon. Robert Forke, Minister of Immigration, in London, and it is possible that some new features will be included in the new agreement.

There are several new proposals respecting foreign immigration which will be taken up with the British Government this summer. Mr. Forke will visit all the immigration departments in the Great Britain, and will also visit the Scandinavian countries to confer with authorities there.

Prepare for Advance On Canton

Four Armies of Hanbok Nationalists Ready for Attack Says Report

Canton, China.—The Hanbok section of the Nationalists (Cantonese) is reported to be preparing for a general advance upon Canton with four armies.

The armies, it is said, will move through Hunan province, attacking Canton by way of the east and north rivers and utilizing the Red forces distributed in the districts en route. Canton, important source of revenue and site of a large arsenal recently declared its independence of both the Hanbok and Nationalist Nationalist regimes. Later, however, the moderates rounded up the forces after which the city nominally adhered to the Nationalist section.

C.N. Earnings Show Increase

Summary for March Shows Substantial Advance Over March, 1925

Montreal.—Increases of \$1,138,292, or 5.13 per cent, in gross earnings and \$715,646, or 1.66 per cent, in net earnings were shown by the operating summary for the Canadian National Railways during the month of March, 1926, as compared with March of last year. Working expenses during the period increased by \$1,054,611, or 1.57 per cent, and the operating ratio for the month was 81.95 per cent, against 82.4 per cent, in March, 1925.

For the first three months of the present calendar year, gross earnings of the Canadian National system are shown to be \$5,512,167, an increase of \$3,465,355, or 5.57 per cent, over the earnings for the corresponding period of 1925.

Predicts Population Of Eight Billion

Total Number on Earth in 300 Years

New York.—Within 300 years the human race will reach a total population of 8,000,000,000 persons, the estimated capacity that can live on the earth's surface, says Professor Albrecht Fick, of the University of Berlin. He arrives on the Hamburg American liner Cleveland to attend the bicentennial of the American Philosophical Society at Philadelphia. Asked what may occur when the earth's surface becomes congested with people, he said: "It passes the facilities of my imagination."

Not Seeking Prize

Paris.—Major Francis Colt French aviator, said that he and his partner, Captain Nungesser, with whom he is planning a trans-Atlantic flight, are not competing for the \$25,000 prize offered by Raymond Orteig for the first flight between New York and Paris. "Our only engagement is to try for a straight line non-stop flight record," Major Colt said.

Plan Longest Non-Stop Rail Run

London.—Plans have now been completed for the new longest non-stop rail run in the world from London to Cardiff, in Lancashire, on the Eastern St. Pancras route. The run will be 236 miles—105 miles longer than the present longest non-stop run on the G.W.R. from London to Plymouth.

Cable Congratulations to Prince

New York.—The Prince of Wales has been congratulated by cable by the American Society for the Prevention of Cruelty to Animals. The Prince refused to attend a bull fight which had been arranged in his honor.

Constructing Fast Submarine

Rome.—An attempt to cross Europe to the United States in fifty hours by means of an especially constructed submarine boat is to be made late this year by Etienne B. Smith, owner of an automobile factory in Alsace, France.

Statue of Laurier

Memorial of Parliament to be Erected at Ottawa

Ottawa.—A statue of Sir Wilfrid Laurier, the memorial authorized by Parliament to express the respect and veneration of the Canadian people for this statesman, is to be erected before July 1, near the southeast corner of the east block, facing Connaught Place from the sloping lawn of the terraced Parliament Hill.

The location is close to Wellington Street and the Chained by three, and today four statues mark the site of the concrete base which will be constructed immediately to carry the statue.

The statue itself is the work of Emile Brunel, of Montreal.

May Propose Abolition Of Large Submarines

Reported Intention of Britain at Three-Power Naval Conference

Geneva.—With the preparatory disarmament commission disbanded, interest now centres on the three-power naval conference, between Great Britain, the United States and Japan, which is expected to open here about June 30, especially as reports have already circulated that Great Britain may propose abolition of large sea-going submarines. In this connection, reports have pointed out the likelihood of the United States insisting on the use of these craft to maintain communications with distant possessions.

"Dud" Shell Kills Workman

Men Were Removing Debris From Famous Langemark Field

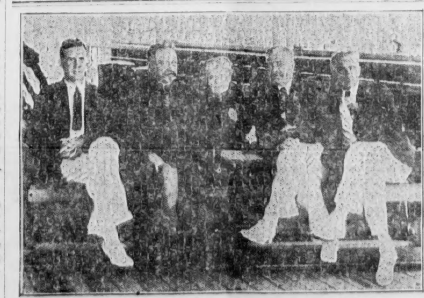

Paris.—The casualty list of the World War was augmented by three deaths when a terrific explosion occurred on the scene of the famous battle ground, Langemark, well known to Canadian soldiers. Two workmen engaged in the still unfinished task of clearing debris from the battlefields while moving a glass unexploded shell found buried in the earth, somehow jarred the brass cap on its nose and were blown to bits in the blast that followed. Another workman standing thirty yards distant was struck by a shell fragment and died in hospital.

OFFER HINTS FOR CELEBRATION OF CANADA JUBILEE

Ottawa.—Ten thousand copies of a pamphlet containing general suggestions for the guidance of committees in charge of local celebrations have been sent to every organized municipality in Canada, to all members of Parliament and members of provincial legislatures, by the national committee for Jubilee celebration.

It is suggested that the mayor or mayor should call a public meeting, to select a Jubilee committee. This committee would have charge of the program for July 1, 2 and 3, and would appoint subcommittees on various phases of the celebration. The pamphlet contains suggestions as to decorations, entertainments and those for the events, with proposals regarding parades, school children, tubulars, veterans and militia, new citizens, old settlers, Indians, descendants of immigrants etc.

The national committee encourages the main celebration for Friday July 1 with a sports program for Saturday and Thanksgiving service on Sunday.

Westerners Back from World Tour

On April 12, 1927, the Canadian Pacific Express crew of Stentland, docked at New York after a successful four-month voyage around the world in their expedition. The group of passengers are all from British Columbia and are, left to right, George A. Turrell, Courtney; Major and Mrs. Thomas H. Woronoff; Kamukoo; Daniel Kilpatrick; Courtney; and Charles E. Blaney, Vancouver.

PAY TRIBUTE TO BRITAIN FOR AID GIVEN IN CHINA

Vancouver.—Mail advices from Shanghai give details of the tribute which the British Government has paid to the British residents of the big Oriental city as a tribute to the prompt action of Britain in sending troops to protect the settlement.

The text of the vote of thanks was as follows: "We, the undersigned, non-British residents of Shanghai, wish to express our appreciation to His British Majesty's Government for the prompt and adequate measures taken for the defense of Shanghai. Though we realize that, quite naturally, the defense of troops was primarily for the defense of its own nationals, the foreigners residing here of whatever nationality have benefited equally."

If the British troops had not arrived when they did, we should now all be in an extremely uncomfortable and dangerous position. If we had not actually been forced to leave the place, it is certain that the women and children would have had to be evacuated, and the settlement would probably have shown the fate of Hankow and Kiating.

The opinion is heard freely expressed on all sides that Great Britain, by the courageous stand she has taken in this crisis, has again given the lead to the whole civilized world.

"Amplifying the above were the following expressions:

"The events of the last few days have brought home forcibly to all of us the immense value of the timely and adequate steps taken by the British Government for the protection of Shanghai. The mere fact of the arrival of the British forces has prevented an earlier outbreak of terrorism in the settlement itself."

"It has, for some time, been clear to most of us that but for the British troops we would not have been here today."

"Of whatever nationality or creed we must admit that when others stood alone, the British Government acted, in spite of all obstacles. We are aware of the political struggles going on in nearly every country in the world today. We know that the British Government is daily harassed and criticized by forces at work to undermine and to destroy. These forces are at work everywhere, here and in our own respective countries."

"It is solemn that most of us call here that an opportunity of doing a good deed, but here is an excellent chance of adding our mite to a big cause; to deliver it but for a brief spell, the stupid hazing of ignorance cunningly employed by dangerous forces."

It is interesting to note that there were 2,350 signatures of members of 32 different nationalities.

To Be Tried As Spy

London.—Sir John returned a true bill against Lord, Commander Colin Mayers, retired British naval officer, who was arrested in March for alleged illegal possession of submarine plans. Commander Mayers will be tried on a charge of obtaining "secret information, sketches, documents and information calculated to be useful to an enemy."

Have Not Prepared Draft

Geneva.—The preparatory disarmament commission adjourned without fulfilling its allotted task of preparing a draft treaty for the reduction of armaments. President London believes a successful disarmament conference is assured.

Intends to Attempt Trans-Atlantic Flight

French War Ace Plans to Make Trip in September

New York.—Captain Rene Fournier, French war ace, has arrived from France. He expressed sorrow over the death of Lieut. Commander Noel Davis and Lieut. Stanton H. Worster in Virginia, and announced that regardless of how many flights might precede him across the Atlantic, he would attempt to fly from New York to Paris in September.

Captain Fournier said the plane he will use will be completed at Culpeper Point, Va., in July and will be a duplicate of the biplane which was hurried up with a loss of two lives when taking off last September.

Despite tragedies the makers of the Bellanca plane, which recently established a new world's endurance record, have announced they are immediately ready to hop off for Paris.

This plane, in which Clarence D. Chamberlain and Bert Acosta stayed in the air almost 52 hours, is the most serious contender in the race. The accident to the Davis machine has not slowed up preparations for its flight.

Preparing for Long Trip

Two Parties of Mounted Police Leaving Soon for Far North

Regina.—Specially selected for physical qualifications and trained to the minute, two parties of Royal Canadian Mounted Police are making final arrangements at head quarters here for an early departure to the far North where they will be stationed for at least two years.

One party will sail from Vancouver in May, for service in the Yukon while the second will make its headquarters at Inuvik, near the mouth of the Mackenzie, some of them destined to do patrol work at Inuvik Island, the extreme Northwest of Canadian territory. The final disposition of the men will be made by those in charge of the northern posts.

Commander T. H. H. and Constables A. W. King and W. H. MacNeil will go to the Yukon.

Ready to leave on the Arctic trip are Constables M. A. Cunningham, W. S. Carter, R. J. Bell, T. G. H. H. and C. H. H. H.

Cannot Use Word "Doctor"

Decision of Ontario Judge Regarding Chiropractors and Osteopaths

Toronto.—Osteopaths and chiropractors are barred from using the word "doctor" in an occupational designation relating to the treatment of human ailments, in a decision handed down by Mr. Justice McEachern on a stated case submitted by J. Edmund Jones. His Lordship states the use of the word by those who are not registered surgeons or physicians under the Ontario Medical Act is held to be illegal.

FIX RAIL RATES THAT WILL HELP CANADIAN TRADE

Ottawa.—The order-in-council under which the Board of Railway Commissioners are conducting an inquiry into freight rates required the commission to do just and reasonable rates that would encourage and develop Canadian trade.

However, A. Fraser, K.C., counsel for the Canadian National Railways, insisted this did not for a moment suggest that the present rates were unjust or unreasonable when they received the approval of the board.

Conditions were constantly changing, Mr. Fraser said, and what was fair and just at some period in the past might need adjusting now. This was what the board was now called upon to consider.

Some discussion arose between Deputy Chief Commissioner Vea and counsel as to exactly what were the limitations of the powers of the Governor-General in council to issue regulations to the board as to the times upon which they should proceed in the adjustment of rates. It was agreed that the commissioners were the sole judges of what would be fair and just rates, subject to appeal to the Governor-General in council and His Excellency's power of review were wide, almost to the degree of being arbitrary.

It was further agreed that an order-in-council might be set forth giving certain principles for the guidance of the Railway Board but if these principles could be shown to be in conflict with the provisions of the Railway Act the order-in-council would have to go.

CANADA AND U.S. CONFER ON NEW BORDER RULING

Washington.—Frank B. Kolb, secretary of state, has taken up with the Labor Department the request of the Canadian government for a joint conference on immigration regulations affecting the movement of Canadian citizens across the border to work in the United States close to the international line.

Acceptance of the Canadian suggestion for a joint conference is foreboding, but the normal course of immigration may be delayed a few days to await a preliminary exchange of views and formulation of United States policy between the state and labor departments.

The regulations issued by the Labor Department placing some restrictions upon Canadians who cross daily back and forth into the United States where they are employed, was made effective six months after their promulgation a week ago.

Fighting War by Radio

League of Nations May Have Powerful Station at Geneva

Geneva.—Radio may be used by the League of Nations in its fight against war.

It is hoped that eventually the League will have its own powerful radio station here. Technicians are to be asked whether it will be possible for a refractory movement to "jam" the wave lengths in order to prevent the League's broadcasting reaching its subjects.

The League Council already has voted to use radio in anti-war demonstrations, possibly to drop League manifestos for citizens of rebellious states. Building of a League aerodrome here has been suggested.

Stole Safe From Toronto Store

Amount Secured by Thieves Only About Fifty Dollars

Toronto.—Entering Arnold's meat market, Dundas street, at an early hour today, thieves directed a small safe weighing about 200 pounds out to the street, and placed it into a waiting motor car, drove off. People living above the store heard the commotion below and telephoned police, who found the doors of the store wide open but to trace of the robbers. The amount of money in the safe will not exceed \$50.

Will Not Repeat Invitation

Geneva.—The League of Nations definitely declined, despite the recent settlement of a long standing controversy between Switzerland and Russia, not to issue a second invitation to Moscow to participate in the forthcoming economic conference. The first invitation was declined because the conference was to be held of Swiss soil.

Will Take Trip Across Canada

Montreal.—Miss Florence Cartier, 78-year-old surviving daughter of Sir George Edmund Cartier, one of the Fathers of Confederation, has accepted an invitation from E. W. Bentley to make a trip across Canada next July with his physician to be "improved steadily." No indication was given as to when Mr. Macdonald would leave the hospital.

New Publicity Man

Edmonton.—D. A. McDaniel, editor of the Alberta Farm Journal, has been appointed publicity commissioner for the Alberta Government, in succession to Colin G. Giff, recently removed to Montreal. He will take up the duties of the office in about two weeks' time.

Ramsay MacDonald Improving

Philadelphia.—Right Hon. J. Ramsay MacDonald, former British Labor Premier, who is in Jefferson hospital recovering from a stroke that was reported by his physician to be "improving steadily." No indication was given as to when Mr. MacDonald would leave the hospital.

Good Reception in North

Proctor, U.S.A. (S.N.C., via A.L. Radio).—Plans have been blessed with phenomenal reception during the winter and still are able to get American as well as European stations during the daylight and speaker volume.

Entitled to Retire

Regina.—Approximately 60 members of the Saskatchewan civil service have received notices that they will be entitled to retirement after July 1. It is estimated that on November 1, if they so wish, there are those who have reached the age of 65 years by May 1.

**CANADIAN NATIONAL
SIXTH ANNUAL TOUR
TO THE PACIFIC COAST**

In pursuance of a time honored
practice of affording its patrons
every facility and convenience tend-
ing toward more vacation enjoy-
ment, the Canadian National in
operating its sixth annual tour
confidently believe this will again
prove of the greatest aid and con-
venience to a host of teachers, as
well as to professional men and
business men and women, vacation
bent.

The tour will commence at Win-
nipeg, from which point a special
train of modern sleeping car equip-
ment, dining car and radio obser-
vation car, will leave July 4th.
The party will be personally con-
ducted by an efficient and experi-
enced representative of the Canadian
National.

After stopping at various points
of interest, the train will arrive at
Prince Rupert on July 9th. At
this latter point the party will em-
bark on a palatial steamship for a
cruise of 550 miles through the
famous "Inside Passage" to Van-
couver. While the tour termi-
nates at Vancouver, those who de-
sire to make a trip to Victoria
may have their tickets read "Victoria"
as their destination without
any additional cost.

This mode of travel has many
advantages. In the first place, it
is planned with a view to includ-
ing in the itinerary the most in-
teresting points, which, with the
other arrangements that are made
obviate the passenger worrying
about connections, sleeping car ac-
commodations, meals, and enter-
tainment enroute. This is all
done in advance by experts, leav-

**CANADIAN NATIONAL
EUROPEAN TOURS**

A maximum of travel through
particularly interesting countries
at a minimum of expense is pro-
vided in the Canadian National
Educational Tours this summer
through Scotland, England, Bel-
gium, France, Switzerland and Italy.

Two tours have been arranged
and sailing will be made from
Montreal July 8, on the 'Andania'
direct to Glasgow. Very careful
attention has been given to itiner-
aries involved.

Tour No. 1 is a 37 day trip on
sea and land, visiting important
cities in Scotland, England, Bel-
gium, France and Switzerland.
All expenses, \$372.50, Montreal to
Great Britain and the Continent
and return to Montreal.

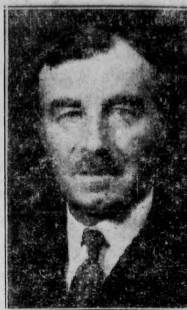

Tour No. 2 is a 51-day trip on
sea and land, visiting in Scotland,
England, France, Belgium, Switzer-
land and Italy. All expenses,
\$501.00, Montreal to Great Brit-
ain and the Continent and re-
turn to Montreal.

There will be low excursion
fares to the seaboard from points
in the Prairie Provinces.

These tours will be personally
conducted from Western Canada,
and while overseas will be under
the direct care and supervision of
thoroughly responsible and re-
liable organization, fully qualified
in every particular to successfully
look after the interests of our
patrons.

The sight-seeing program is
very complete and generous. Mo-
tor coaches and automobiles are
freely used. All sight-seeing is
well planned to save unnecessary
fatigue and to see the worth-while
places within the time at our dis-
posal. Competent lecturers will
reveal to our patrons the out-
standing features, literary, his-
toric, artistic or scenic of the Old
World centres visited.

J. T. Kerr, local agent for the
Canadian National Railways, will
be glad to discuss these tours and
arrange all details.

CECIL EWART

APPOINTED industrial commis-
sioner of the Canadian National
Railway in Canada, with headquarters
at Winnipeg. It will be Mr. Ewart's
work to assist the establishment of
new industries in Western Canada and
to develop those already existing. Mr.
Ewart prior to his appointment, was
divisional engineer of construction,
location and maintenance of way, with
headquarters in Saskatoon.

ing the passenger fire to enjoy
to the full the scenery and attrac-
tions attendant to such tours.

The local agent of the Canadian
National Railways will be pleased
to give you full particulars of this
tour.

Around the Town**Mothers' Day Sunday.**

Spiece & Son have disposed of
Pontiac sedans to Messrs. Rex
Simpson and J. W. Hume.

Henry Flewelling has re-
turned home from the Camrose
hospital last week. Although
recovered from his operation,
he is still in a very weak con-
dition.

Mrs. R. W. McDonnell, who is
undergoing treatment in Cal-
gary, at last reports, is very
much improved in health.

The passenger train from the
south now only runs as far as
Tofield, necessitating a change
either at Camrose or Tofield.

Taxis, Monday 7 p.m. C.G.L.
T., Wednesday, 7 p.m.; Trail
Rangers, Friday, 7 p.m.; Ben-
vers, Saturday, 10 a.m.

H. J. Snell, Optometrist, will
be at the W. I. building, Mirror,
on Friday, May 20th, and
every third Friday of the
month thereafter.

FOR SALE—Seed barley.
Apply to A. Jacques, RI07, Mir-
ror.

Miss MacLean, Calgary, ar-
rived in the village on Wednes-
day and is the guest of Mrs. R.
Conway.

Mr. Baugh, of Pollockville,
spent Sunday with his brother
in town.

Mrs. Morley, from Ontario, is
making an extended visit as
the guest of Mrs. J. W. Spiece,
who on Monday afternoon gave
a delightful in honor of her
birthday, a large number being
present.

The W. A. gave a surprise
party in honor of Mrs. J. P.
Webster on Monday evening.

Rev. G. M. Morgan is in La-
combe this week in connection
with church work.

Mrs. Morrison returned
home from the East Saturday.

Next Sunday being Mothers'
Day, special addresses in keep-
ing with the occasion will be
given in the Sunday Schools
and in the United Church at
7.30 p.m.

Born—On May 1, at Lacombe
to Mr. and Mrs. G. P. Puffer; a
son.

Mrs. Tulloch and son left last
week for Dewberry, where they
in future will reside.

For Rent—Small house in the
centre of the town. Handy to
railway shops. J. G. Russell.

On Saturday, May 7th, at the
regular meeting of the W. I.,
a demonstration on making
and baking an Angel Cake, will
be demonstrated by Mrs. H. G.
Williams at 2.30 p.m. Business
meeting at 3 p.m. Visitors are
welcome.

Printing That Is Worth While

The Postoffice Department suggests that all
should have their return address printed on
their envelopes. Unless this is properly done
it is not worth while. We can print and sup-
ply envelopes for very little more than you
buy the envelope at retail.
